STEPS TO SUCCESS

STEPS TO SUCCESS

- **Set a schedule and stick to it.** Pick a time of the day and don't vary. Consistency builds habit which leads to great results!
- **Set realistic goals.** It is important to set a goal and achieve it, adding difficulty as you can handle it.
- **Chart your progress.** Place it on the refrigerator where you can see it often. Put a picture of your favorite "in-shape star" next to the chart to remind you where you're headed!
- **If you fall off the horse, collect yourself and get back on!** That's OK. Just re-evaluate your goals if required, but by all means - begin again!
- **Begin each session by stretching and loosening your muscles through a warm up routine.**
- **Do the exercises slowly and in a controlled, smooth and fluid manner. Steady effort will build strong muscles.**

You may want to follow this workout plan below. If you find the exercises are too hard, reduce the amount of repetitions. Your upper body strength will only improve if you use IRON GYM™ correctly and on a regular basis. If you find the exercises too easy, increase the repetitions and use IRON GYM™ more frequently.

A repetition is defined as one of a series of identical movements. Each time you perform an exercise, that is considered a repetition.

INSTALLATION

IRON GYM™

The IRON GYM™ attaches and removes from standard door frames (24" to 32" wide) in seconds! ("Extended Long Bar" available to accommodate doorways from 34" - 38" wide. See included Mail-In Offer for details.)

CAUTION: Before use, carefully read and understand all of the following directions for proper installation. Also, make sure the door frame and moldings are secure and solid before installing IRON GYM™. A weak door frame and/or moldings can cause the unit to fail and dislodge from the door way. IRON GYM™ is only intended for use to perform the exercises outlined in this guide and the official IRON GYM™ Ab Straps instructions.

1. Insert the included "Safety Wedge" (pointed end facing down) behind the top door frame molding on the hinge side of the door opening until secure (**SEE FIG. 1**). The "Safety Wedge" is designed to help prevent IRON GYM™ from unexpectedly falling off of the door frame when not in use.
2. Next, position the bottom edge of the "Plastic Bar" into the installed "Safety Wedge" then guide IRON GYM™ down until it is securely resting on the top of the door frame / molding (**SEE FIG. 2**). If "Plastic Bar" does not securely rest on the top of the door frame/molding do not use.
3. Then, make sure the IRON GYM™'s two "Rubberized Door-Frame Protectors" on the opposite side of the door opening are in full contact with and securely resting against the two side door frame moldings (**SEE FIG. 3**).

IMPORTANT: Before using the IRON GYM™, tug down on the Grips to make sure the unit is securely installed into the door frame. If IRON GYM™ is not securely installed into the door frame, do not use.

As IRON GYM™ is not designed for permanent installation, remove it from the door frame (**SEE FIG. 4**) and store away in a safe place until next use, to make sure it does not accidentally fall off when not in use. The "Safety Wedge" should be left installed into the top of the door frame molding.

EXERCISES

NOTE: The maximum weight of use for this item is 300 lbs.

Before you start, make sure your IRON GYM™ is securely assembled (and installed into the door frame for applicable exercises) according to the instructions in this manual.

Be sure to start each exercise session by stretching and loosening your muscles through a warm-up routine. Do the exercises slowly in a controlled, smooth and fluid manner.

Use variable hand grip positions to target different muscle areas (**SEE FIG. 5**). Interchange the position of your hands from overhand to underhand with each exercise.

NOTE: Do not overexert yourself. Start out slowly and work your way up to a more vigorous workout. Gradually increase the number of repetitions over time.

FIG. 5 VARIABLE GRIP POSITIONS

PULL-UP

1. Refer to the Variable Hand Grip Positions for Pull Ups (SEE Page 7 FIG 5).
2. Hold the desired Grips, then pull yourself up and lower yourself down in a slow, controlled manner, with the soles of your feet parallel to the floor.
3. Continue your workout until you feel you are no longer using good form.

PUSH-UP

1. Choose a clear place on the floor and set the IRON GYM™ down. Grab and hold the desired grips, then slowly lower yourself towards the floor until you reach the bottom of the push.
2. Slowly push away from the floor until you reach the peak of the push up and you are back in the starting position.
3. Continue your workout until you feel you are no longer using good form.

SIT-UP

1. Place IRON GYM™ in the base of the doorway then pull back to make sure the two “Rubber Door-Frame Protectors” on the opposite side of the door opening come in full contact with the two sides of the door frame.
2. Place your feet underneath the “Long Bar” then bend your feet upwards while keeping your heels against the floor to grab on.
3. As you perform each sit up, pull back on the “Long Bar” with your feet while making sure your heels stay in contact with the floor. This will give you support and proper form.
4. Continue your workout until you feel you are no longer using good form.

DIP

1. Place IRON GYM™ on the floor with “Arched Bar Grips” facing upward. Sit on the floor facing away from the IRON GYM™.
2. Place hands on the “Arched Bar Grips” behind you while making sure your legs are fully extended out with your feet touching.
3. Slowly lower body downward in a straight and controlled motion.
4. Continue your workout until you feel you are no longer using good form.
5. For an advanced Dips workout, place a stable object such as a step stool underneath the heels of your feet.
